Directions (21-25): The following questions are accompanied by two statements A and B. You have to determine which statements(s) is/are sufficient/necessary to answer the questions.

(a) Statement A alone is sufficient to answer the question but statement B alone is not sufficient to answer the questions.

(b) Statement B alone is sufficient to answer the question but statement A alone is not sufficient to answer the question.

(c) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question.

(d) Either statement A or statement B by itself is sufficient to answer the question.

(e) Statements A and B taken together are not sufficient to answer the question

Q21. What is the value of rate of interest?

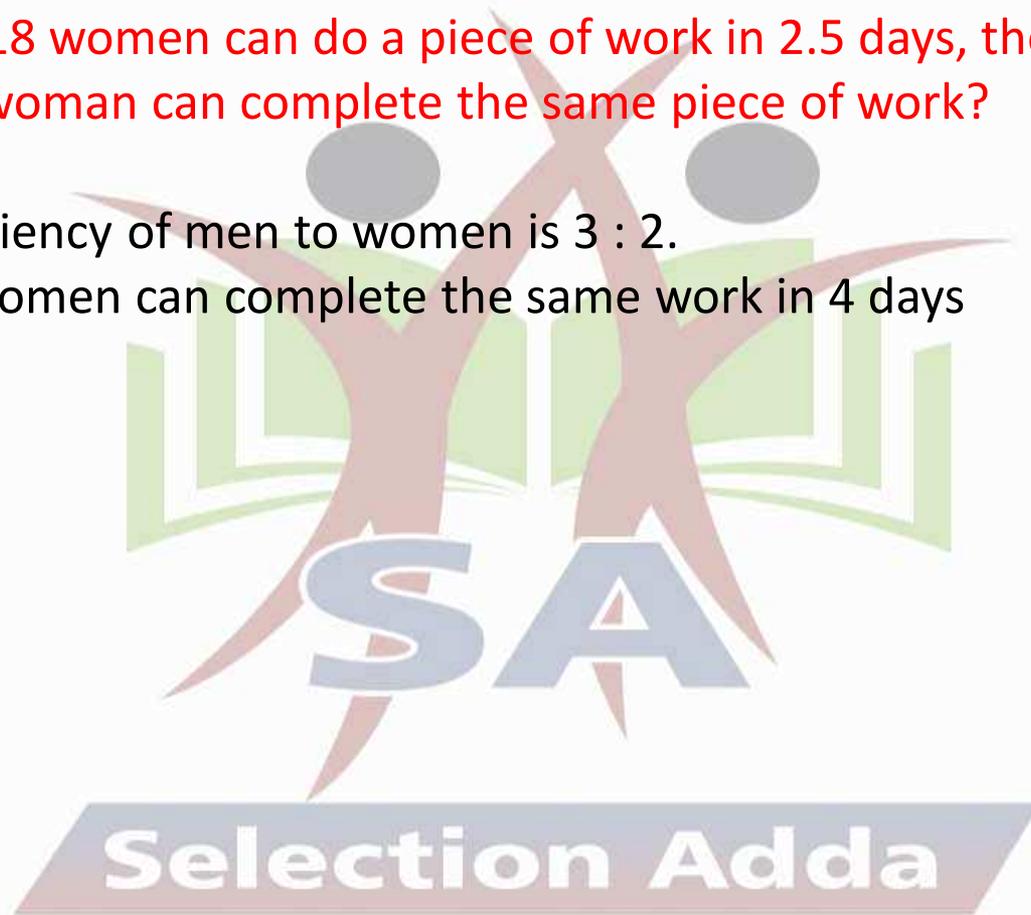

A. A sum of Rs 8000 is invested at simple interest for 3 years in scheme A which offers a certain rate of interest. Amount obtained from scheme A is equal to the amount obtained when Rs 9000 is invested in scheme B for 2 years at C.I.

B. Rate of interest for scheme B is same as rate of interest for scheme A.

Q22. 4 men & 18 women can do a piece of work in 2.5 days, then in how many days 12 woman can complete the same piece of work?

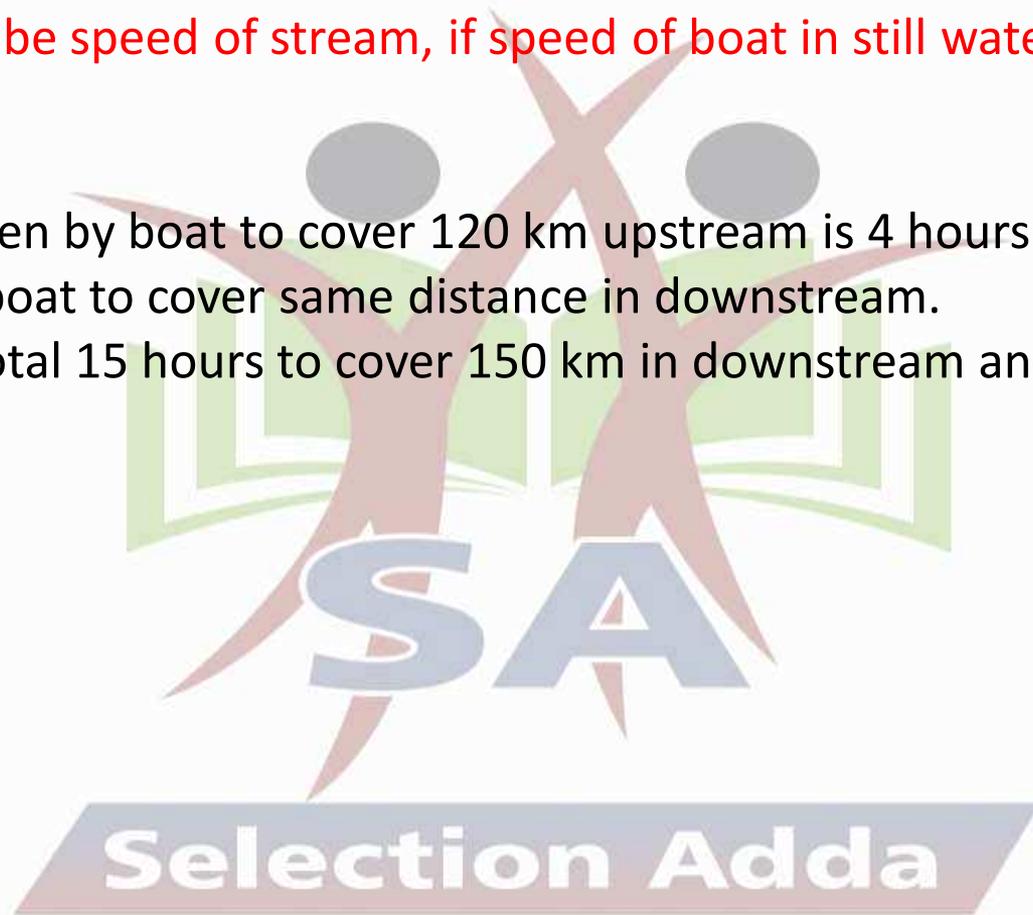

A. Ratio of efficiency of men to women is 3 : 2.

B. 6 men & 6 women can complete the same work in 4 days

Q23. What will be speed of stream, if speed of boat in still water is 22.5 km/hr?

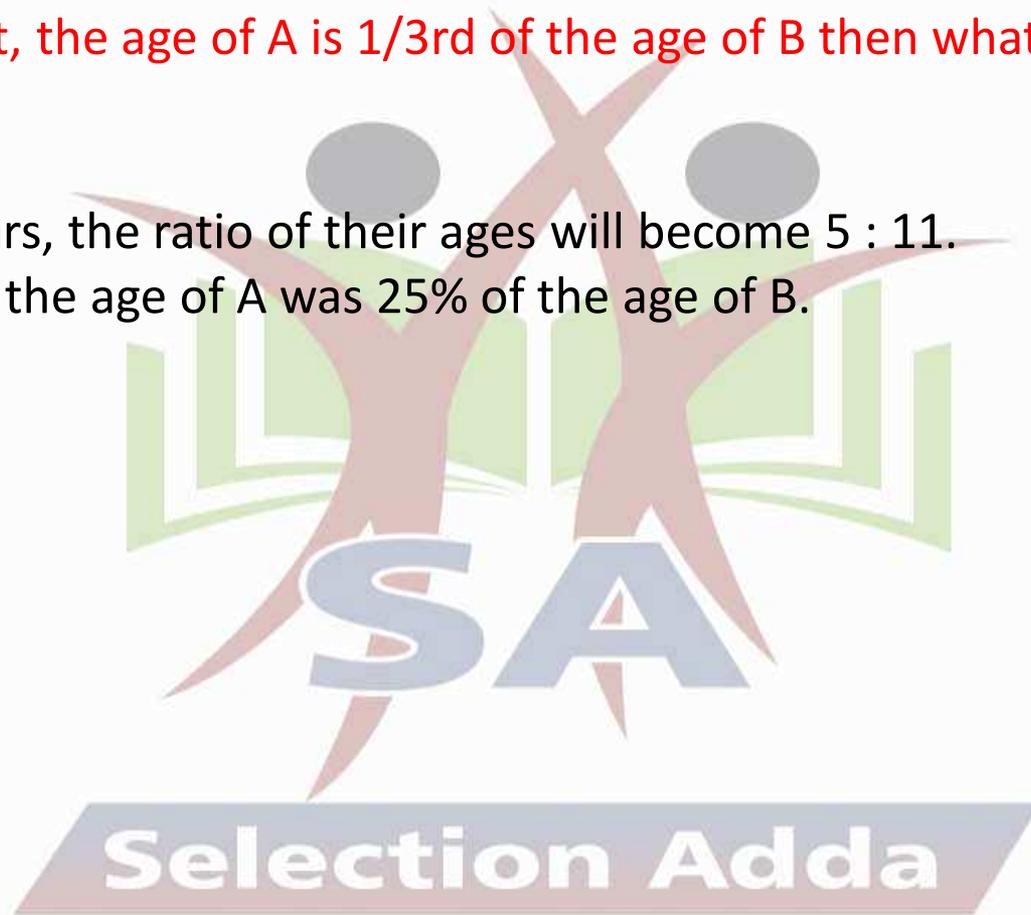

- A. The time taken by boat to cover 120 km upstream is 4 hours more than time taken by boat to cover same distance in downstream.
- B. Boat takes total 15 hours to cover 150 km in downstream and upstream.

Q24. At present, the age of A is $\frac{1}{3}$ rd of the age of B then what are their ages?

A : After 10 years, the ratio of their ages will become 5 : 11.

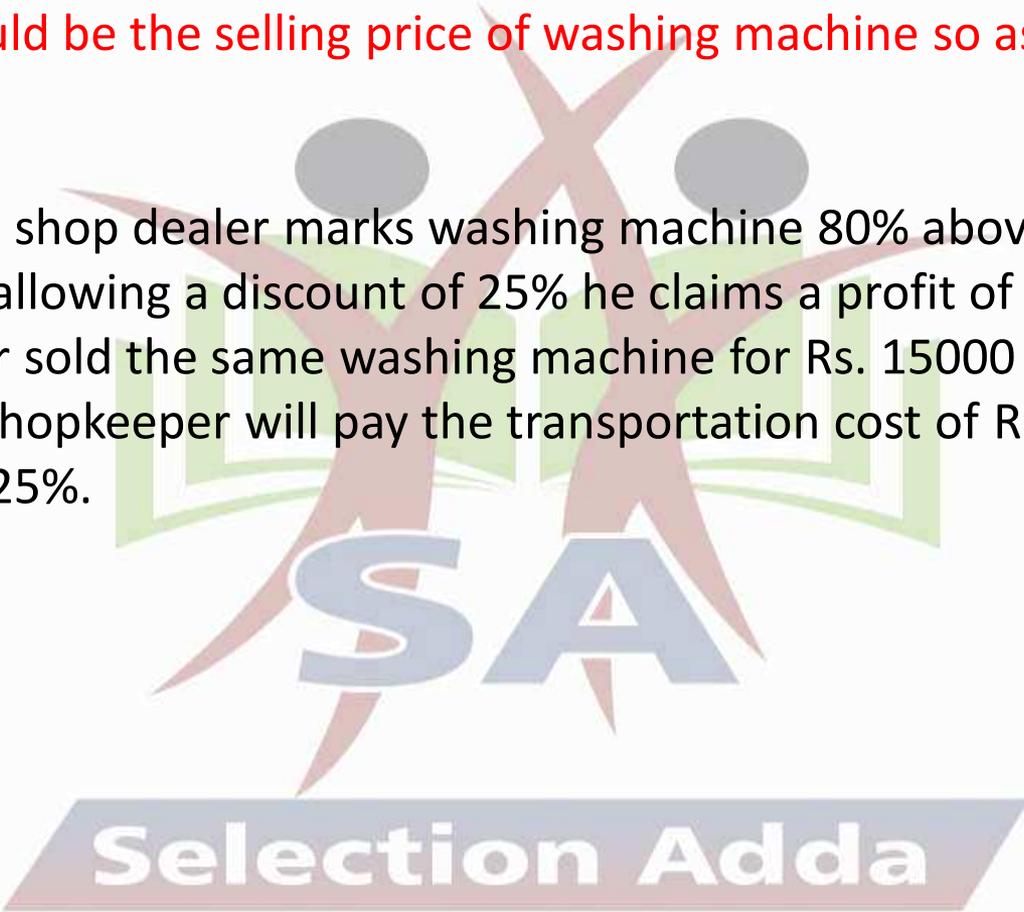

B : 5 years age, the age of A was 25% of the age of B.

Q25. What should be the selling price of washing machine so as to make a profit of 25%?

A: An electronic shop dealer marks washing machine 80% above the cost price and after allowing a discount of 25% he claims a profit of Rs. 3500.

B: A shopkeeper sold the same washing machine for Rs. 15000 on the condition that shopkeeper will pay the transportation cost of Rs 2000 and he gets a profit of 25%.
